Return to CIA Library

1. Fourteen cantonment buildings, 40 x 150 feet each, were under construction in PEENEMÜNDE as quarters for air force personnel.
2. The runway was 7,200 feet long.
3. About 100 single-engine fighters were parked at the field.

Comment :

- a. The construction of cantonment buildings was confirmed by other sources.
- b. The reported length of the runway is correct.
- c. The number of aircraft agrees with previous reports. It is assumed that at least two, probably three fighter regiments are stationed at the field. These regiments are assigned to the 294th Atr Div.
